MUTUR FleetCross Prototype, Scripted Walkthrough

For the Catalyst platform, MOTOR is implementing a **direct-to-development prototype for FleetCross.** This prototype is designed directly within the existing Catalyst application using front-end code (HTML, CSS) based on UI standards, frameworks and architecture already in place. It is mainly hard-coded using the existing Angular framework to construct discrete prototype modules, utilizing very little middleware or backend development beyond what is already built. This reduces the need to render concepts in throwaway mediums (paper prototypes, high-fidelity comps, etc.) that are completely outside the code environment. Most importantly, this requires very little full-stack development time and resources. Because of its perception as "the real deal", a direct-to-development, hard-coded prototype allows quicker, more accurate user testing results. It also greatly reduces time to develop the presentation layer because much of the UI code and structure is already complete.

Scripted Walkthrough of FleetCross

Login

To access the FleetCross prototype, a user must login at URL https://devapps.motor.com (dev) or https://apps.motor.com (prod, if available) with a valid Catalyst ID/password that has added the FleetCross subscription.

MOTOR Apps Landing Page

мото	R			wsmith 🗸 🗮
	Part Illustrations	AccuPI	FleetCross	APPS More MOTOR Apps

The first page view is the MOTOR Apps Landing page, showing the button for FleetCross as well as existing Catalyst applications Part Illustrations and AccuPI. Along with the FleetCross subscription, the button "More MOTOR Apps" is available for review.

Note: The application WebCAT will appear if the user has added the WebCAT subscription.

In the Research Results Sidebar, click close the Parts Results and/or scroll down to show the Catalog Results

1) Select Baldwin Filters, Inc. (BLDRL) – This will display all keyword results found under this category.

Description of Functionalities;

- a) Opens an overlay listing all the catalogs available from the manufacturer. The user can then access the entire catalog via PDF Viewer.
- b) Summary statistics on the keyword search.
- c) Link to specific keywords referenced within a catalog. Opens in to PDF Viewer overlay.
- d) Shows what keywords are found within the specific search result.

When a result link is selected, the PDF Viewer overlay is opened to that reference within the catalog (see: Part Details Overlay – Selecting CATALOG References).
